EXPERIENCE

Senior Software Engineer

EPAM Systems

📅 12/2022 - Present 📍 Astana, Kazakhstan

- Owned end-to-end integration between legacy .NET systems and cloud-native APIs, enabling horizontal scaling to 1,000+ RPS and reducing system coupling across core services.
- Identified and resolved a critical architectural defect in the frontend-to-API integration layer that corrupted critical data structures. This fix protected 80% of the platform's content (data-driven tables), ensuring system integrity and preventing potential data loss.
- Optimized high-load database operations within the enterprise environment, achieving a 35% reduction in API latency by implementing advanced indexing and efficient data retrieval patterns.
- Streamlined team coordination and sprint planning by optimizing daily stand-ups and refinement processes, which reduced meeting overhead by 20% and increased overall sprint velocity.
- Mentored junior engineers on best practices for building scalable, high-availability services, ensuring code stability and long-term maintainability for mission-critical enterprise systems.

Software Engineer

2GIS

📅 07/2021 - 12/2022 📍 Novosibirsk, Russia

- Engineered in collaboration with analytics and data platform teams, a high-throughput ETL pipeline capable of processing 200M+ rows daily to support near real-time analytics, ensuring data consistency and low-latency availability for business intelligence.
- Designed and deployed an automated migration utility (Excel-to-SQL), which eliminated manual data entry for the analytics team and saved approximately 10 hours per week of manual labor.
- Modernized CI/CD infrastructure by implementing automated pipelines and test environment deployments in TeamCity, reducing deployment cycle time from 1 hour to 10 minutes and significantly increasing release stability.

Software Engineer

FG BCS

📅 11/2020 - 07/2021 📍 Novosibirsk, Russia

- Enhanced error handling and logging mechanisms, reducing incident triage time
- Delivered critical backend features for the DWH-support service, optimizing complex reporting pipelines and improving overall reporting efficiency by 25% for internal stakeholders.

Junior Software Engineer

XTools Pro, Inc

📅 04/2018 - 11/2020 📍 Novosibirsk, Russia

- Engineered an asynchronous data search algorithm using Task Queues, which enabled high-performance geodata processing and eliminated UI-blocking operations in the ArcGIS environment.
- Developed and integrated robust Excel-to-ArcGIS data connectors, significantly streamlining complex geodata workflows and reducing manual data import efforts for end-users.

Junior Software Engineer

EPAM Systems

📅 01/2016 - 08/2016 📍 Karaganda, Kazakhstan

- Built custom VSTO-based UI controls for Microsoft Office suite, improving onboarding experience
- Set up automated CI/CD pipelines with Jenkins, cutting manual deployment effort

SUMMARY

Senior Engineer with 8+ years of expertise in architecting scalable, cloud-native microservices and complex web platforms. Proven track record in delivering high-impact solutions across Fintech, GIS, and Enterprise ecosystems. Focused on driving system efficiency, optimizing performance, and leveraging AI-driven workflows to accelerate development and business success.

TECHNICAL SKILLS

- **Languages:** C#, Python, TypeScript, SQL, JavaScript.
- **Frameworks & Libraries:** .NET (Framework/Core/5+), ASP.NET, React, Angular, Entity Framework, Node.js.
- **Cloud & Infrastructure:** AWS (EC2, Lambda, S3, SQS/SNS), Docker, CI/CD (GitHub Actions, Jenkins, TeamCity), Kubernetes (foundational knowledge).
- **Databases & Storage:** PostgreSQL, MS SQL Server, MongoDB, Redis (Distributed Caching).
- **Arch & Methodology:** Microservices, Clean Architecture, CQRS, DDD, RESTful APIs, Agile/Scrum/Kanban.
- **AI Agents & Assistants:** Built an AI-powered code analysis system by reverse-engineering undocumented SDK capabilities, extracting domain knowledge from code and tests into structured documentation and Q&A, reducing bug-fixing time by 15%

EDUCATION

Master of Engineering - Computer Science

Novosibirsk State University

📅 09/2016 - 06/2018 📍 Novosibirsk, Russia

Bachelor of Engineering - Information Systems

Karaganda State Technical University

📅 09/2012 - 06/2016 📍 Karaganda, Kazakhstan

LANGUAGES

English

Professional Working Proficiency C1

Russian
