

Alex Slepenkov

Senior Software Engineer | .NET, AWS, AI Agents

alexmichel249@gmail.com | [linkedin.com/in/alex-slepenkov](https://www.linkedin.com/in/alex-slepenkov) | Astana, Kazakhstan | Open to remote & relocation

SUMMARY

Senior Software Engineer specializing in agentic engineering: I build the agents, tools, skills and harnesses that let LLMs run the full SDLC (design, code, test, review, deploy) behind automated quality gates. 8+ years in .NET; 4+ years shipping scalable TypeScript and AWS platforms.

EXPERIENCE

- Senior Software Engineer**, EPAM Systems | Astana, Kazakhstan 12/2022 – Present
- Built agentic debugging tools for .NET and JavaScript that find root causes autonomously.
 - Built an AI code-review assistant and reusable AI skills; tuned the agent harness for reliability and output quality.
 - Migrated .NET 6 to .NET 10 and delivered React/.NET features with AI agents.
 - Designed and owned end-to-end distributed integration of legacy .NET systems with cloud-native REST APIs, enabling horizontal scaling and reducing coupling across core services; built on AWS (Lambda, SQS, SNS, S3, IAM) with Terraform, using idempotent processing, retries and dead-letter queues.
 - Fixed a critical data-corruption defect in the frontend-to-API integration layer affecting data-driven tables.
 - Cut API latency 35% on high-load database operations through advanced indexing and efficient data-retrieval patterns.
 - Ran services on Kubernetes with observability (logs, metrics, alerts); built an end-to-end test suite and maintained GitLab CI/CD pipelines.
 - Mentored junior engineers on building scalable, highly available services with long-term maintainability.
- Software Engineer**, 2GIS | Novosibirsk, Russia 07/2021 – 12/2022
- Built an ETL pipeline processing 200M+ rows daily for near real-time analytics.
 - Cut deployment time from 1 hour to 10 minutes (TeamCity pipelines); built an Excel-to-SQL tool saving about 10 hours/week.
- Software Engineer**, FG BCS | Novosibirsk, Russia 11/2020 – 07/2021
- Delivered DWH-support backend features, improving reporting efficiency by 25%.
- Junior Software Engineer**, XTools Pro | Novosibirsk, Russia 04/2018 – 11/2020
- Built asynchronous task-queue geodata search for ArcGIS and Excel-to-ArcGIS connectors.
- Junior Software Engineer**, EPAM Systems | Karaganda, Kazakhstan 01/2016 – 08/2016
- Built custom VSTO-based UI controls for the Microsoft Office suite, improving onboarding experience.

PERSONAL PROJECTS

42 – Agentic Factory – autonomous full-SDLC pipeline (spec, tickets, parallel worktrees, clean-context review, verify, auto-fix) with planner/implementer/reviewer/verifier sub-agents; works with Claude Code, Codex, Cursor. github.com/aslepenkov/42

TestCat – minimalistic test-based code-analysis agent (chat-completion + tool-call loop) on the GitHub Copilot API; CLI, REST/WebSocket backend and dashboard, multi-service Docker (TypeScript). github.com/aslepenkov/TestCat

dotnetcv – High-Scale Microservices Architecture Demo – language-agnostic e-commerce system (.NET 9, Django, React/TypeScript) using CQRS, Clean Architecture, outbox pattern, RabbitMQ, Redis, PostgreSQL; Docker Compose, Kubernetes, LocalStack (AWS), Grafana observability. github.com/aslepenkov/dotnetcv

TECHNICAL SKILLS

Agentic AI: custom CLI agents, custom tools, skills and sub-agents, MCP servers, hooks and harness tuning, full-SDLC agentic development (plan, code, test, quality gates, review, CI/CD)

LLM Integration: local models (Ollama) and hosted APIs (OpenAI, Anthropic, NVIDIA NIM), OpenAI Agents SDK, RAG, prompt engineering, GitHub Copilot, Cursor, Claude Code, Codex, OMP

Languages: C#, TypeScript, JavaScript, Python, SQL

Frameworks: .NET, .NET Framework, Entity Framework, React, Angular, Node.js

Cloud & DevOps: AWS (Lambda, SQS, SNS, S3, IAM, EC2), Terraform, Docker, Kubernetes, observability, GitLab CI, GitHub Actions, Jenkins, TeamCity

Databases: PostgreSQL, MS SQL Server, MongoDB, Redis

Architecture & Practices: Microservices, distributed systems, system design, REST API design, Clean Architecture, CQRS, DDD, spec-driven development, TDD

EDUCATION & LANGUAGES

M.Eng. Computer Science and Engineering, Novosibirsk State University (2018)
B.Eng. Information Systems, Karaganda State Technical University (2016)
English: professional (C1) | Russian: native
